AI/ML ENGINEER | GENERATIVE AI | LLM | RAG | AI AGENTS

AI/ML Engineer and Software Developer with experience building Generative AI applications, LLM/RAG pipelines, multi-agent workflows, backend services, and automation solutions. Hands-on with Python, Java, LangChain, LangGraph, MCP, TensorFlow, PyTorch, AWS, Docker, and REST APIs. Experienced in document ingestion, semantic search, prompt engineering, AI-agent orchestration, model evaluation, and enterprise application integration.

TECHNICAL SKILLS

Languages: Python, Java, SQL, C, C++

AI/ML: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, Transformers, RAG, TensorFlow, PyTorch, scikit-learn

AI Agents: LangChain, LangGraph, Multi-Agent Systems, Agent Orchestration, MCP, AI Workflows

Data/MLOps: Pandas, NumPy, Data Engineering, Data Pipelines, Model Deployment, MLOps, Precision, Recall

Backend/Cloud: FastAPI, Flask, Spring Boot, REST APIs, CI/CD

Databases/Integration: MySQL, MongoDB, MuleSoft, Mule 4, WebMethods, DataWeave, XML, JSON

PROFESSIONAL EXPERIENCE

Software Developer | UST Global | Kochi, India | April 2024 – Present

- Develop backend services and REST APIs using Python and Java for enterprise application and integration requirements.
- Build Generative AI solutions using LLMs, RAG, LangChain, and LangGraph for intelligent automation and information retrieval.
- Design multi-agent workflows for AI applications, including agent orchestration, task routing, content generation, and automated workflows.
- Develop Python-based automation and data-processing utilities to reduce repetitive manual engineering activities.
- Implement document ingestion, semantic retrieval, vector-search, and question-answering workflows for RAG applications.
- Apply prompt engineering and evaluation approaches using precision, recall, and A/B testing where applicable.
- Work with AWS, Docker, CI/CD, REST APIs, XML/JSON transformations, databases, and enterprise integration technologies.

PROJECTS

OnePostLnkdn | multi-Agent AI

- Designed a LangGraph-based multi-agent workflow to generate, review, and publish LinkedIn content from provided documents.
- Implemented prompt templates, agent orchestration, email approval, and scheduled daily publishing workflows.

PratAI | AI News Intelligence

- Developed a multi-agent AI news-digest application to research, filter, summarize, and curate the top 10 AI developments weekly.
- Automated email delivery of generated AI news digests.

AT Asset Cleanup Utility | Python / Data Engineering

- Developed a Python utility to automate cleanup of XML-based Active Transfer assets and remove unnecessary dependency blocks.
- Reduced repetitive manual asset-cleaning work for engineering colleagues.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science & Engineering | Shershah Engineering College, Sasaram | 2023 | CGPA: 8.24

CERTIFICATIONS

Spring Boot Certification – JSpiders | MuleSoft Developer Certification
